

UNDERGRADUATE RESEARCH SYMPOSIUM

THURSDAY, APRIL 18, PROGRAM

elcome to the sixth annual campus-wide Undergraduate Research Symposium (URS). The breadth and scope of the oral and poster presentations as well as the

performances featured today reflect not only the wide range of academic disciplines at the University of Illinois, but also speak to the caliber of our undergraduate students. Our students are enterprising and thoughtful, eager to learn from their advisors and mentors. Their projects also demonstrate the ongoing commitment of our faculty to support and expand undergraduate research opportunities on campus and beyond.

The presentations, posters, and performances listed here address some of society's most pressing issues, including education, health care, violent conflict, and natural disasters. As is true of the mentors who support them, these students and their projects hold the potential to change the world for the better. The featured session during lunchtime includes presentations from three students who are engaged in applied research that seeks to construct practical solutions to the problems of environmental sustainability, prescription drug dispensing, and disability access.

URS 2013 includes a record number of participants from an expansive range of departments, colleges, and other units on campus. Also, for the first time, there will be awards in various categories for the best posters and presentations. Judges include university administrators and distinguished faculty members. URS is made possible by support from the Office of Undergraduate Research (OUR), a unit of the Provost's Office, as well as the Office of Admissions. Special thanks go to Dr. Matthew Price, the Undergraduate Research and National and International Scholarships Coordinator; Megan Weaver, intern for OUR; and OUR's Advisory Board members.

ISUR POSTER EXPO

4:30-6:30 P.M., LEVIS FACULTY CENTER (1ST FLOOR)

The Illinois Scholar Undergraduate Research (ISUR) program is a year-long experience for engineering students. It is generously funded by the Semiconductor Research Corporation, Rockwell Collins, and Shell. Through this program, undergraduate scholars are offered a unique opportunity to expand their academic experience beyond the walls of the traditional classroom. Students are introduced to research by working closely with graduate student mentors and faculty sponsors on research projects. The ISUR Poster Expo is open to the public.
